	<i>The Framework for Statistical Reasoning and the Mathematical Modeling Framework should be taught throughout the units. The K-12 Mathematical Practices should be evidenced at some point throughout each unit depending on the tasks that are explored. It is important to note that MPs 1, 3 and 6 should support the learning in every lesson.</i>								
Content Specific Information	<ul style="list-style-type: none"> Collect, analyze & display data through picture & bar graphs Extend understanding of the value of numbers to 1,000 Solve problems involving addition & subtraction within 1,000 Develop fluency using mental math and strategies 	<ul style="list-style-type: none"> Solve addition & subtraction problems within 100 Solve real-life addition & subtraction problems including charts and graphs Develop understanding of the value of numbers to 1,000 Continue to develop fluency using mental math and strategies 	<ul style="list-style-type: none"> Learn about standard units to estimate, measure, & compare length & distances (inches, feet, & yards). Use addition & subtraction to solve problems involving measurement Develop understanding of the value of numbers to 1,000 Demonstrate an understanding of counting sequences Solve problems involving addition and subtraction within 1,000 Continue to develop fluency using mental math and strategies 	<ul style="list-style-type: none"> Extend understanding of the value of numbers to 1,000 Demonstrate an understanding of counting sequences Solve problems involving addition and subtraction within 1,000 Continue to develop fluency using mental math and strategies 	<ul style="list-style-type: none"> Create, locate numbers, & represent whole number sums & differences within a standard unit of measurement on a number line diagram Continue to develop understanding of the value of numbers to 1,000 by representing, ordering, & comparing Demonstrate an understanding of counting sequences Apply the understanding of addition to 100 to solve real world problems involving addition & subtraction within 1,000 	<ul style="list-style-type: none"> Reason about attributes (features) of shapes as they describe, compare, & draw them Identify lines of symmetry in everyday objects Partition circles & rectangles & recognize that equal shares may be different shapes Use shapes to create growing & shrinking patterns & identify & describe these patterns using addition & subtraction Continue to review & develop their understanding of the value of numbers to 1,000, the counting sequence, & solve real world problems 	<ul style="list-style-type: none"> Learn to read analog & digital clocks to the nearest 5 minutes, estimate and measure elapsed time to the hour and half hour Use coins learned in previous grades to determine the value of a combination of coins or bills Use addition & subtraction to solve problems involving time & money Continue to investigate the value of numbers to 1,000, the counting sequence, & solve real world problems involving addition & subtraction within 1,000 	<ul style="list-style-type: none"> Work with equal groups Create arrays to solve problems Extend knowledge of equal groups to determine odd & even Write & solve equations to represent equal groups & arrays with up to 5 rows and 5 columns Identify, describe, create, & extend numerical patterns in addition & subtraction as related to equal groups & arrays Continue to review & develop their understanding of the value of numbers to 1,000, the counting 	The capstone unit applies content that has already been learned in previous interdisciplinary PBLs and units throughout the school year. The capstone unit is an interdisciplinary unit that allows students to create a presentation, report, or demonstration that could include their models used to answer an overarching driving question. (e.g., Students can present their solution(s), findings, project, or answer to the driving question to a larger audience during the culminating capstone unit.)
